

Digital Turnaround Proposal

Your own ordering, shop-floor & growth system — zero commission, every customer yours.

Prepared by Elie D. for the Dough Boss ownership team · 17 June 2026 · Confidential · Site backup completed before implementation

\$0

per-order commission (vs 7–35% on the apps)

≈\$4.5–6k

to start (first 2 weeks, mate's rate)

~2–5 mo

setup pays back from app savings*

\$800 + 5%

weekly base + a share of online sales

Dough Boss already has brand equity, **three shops (Bankstown, Revesby, Roselands)**, a proven food offer and a working website. This turns that brochure-style site into **DoughBoss Digital OS** — orders land **instantly on a screen in each kitchen**, customers pay by card, and you keep **100% of every dollar and 100% of your customers**. The kitchen order board (Phase 1) is **already in development**.

Straight up: this is a **large, multi-month build** — a real software platform across three shops, payments and live kitchens, not a website refresh. Even with AI accelerating the work it takes serious **time, expertise, testing and energy**. It's staged so you fund it in sensible steps and see value early — and my fee is a **genuine 50% mate's rate**.

1 Executive summary

We transform the website into **DoughBoss Digital OS** — a direct **ordering, shop-operations and marketing platform** — built in stages, inside the existing site, without disrupting the live business. We prove real online ordering and a live kitchen screen first, then expand into payments, marketing, multi-shop reporting and growth. You own the system, the orders and the customers.

2 Where you are today

- **43 menu items already on the site** — not yet wired into ordering, and the menu has a display bug (*Flat Bread 11"* shows empty).
- The ordering engine is installed but in a **demo state** (US dollars, generic toppings, empty live menu).
- **No live kitchen view** and **no online card payment** yet.

- **Marketing not measured:** no SEO plugin, **66/66 images missing “alt” text**, no Facebook/TikTok/Google tracking. Catering/wholesale leads aren't captured.

3 The real tangible value

What you gain	Why it's real money / real value
Commission kept	Every direct order avoids a 7–35% app cut — thousands a month back in your pocket (tables in §6).
A customer database you own	Names, phones, order history across all shops — an asset the apps never give you, worth more each month.
Fewer missed / wrong orders	Live screens + alerts → fewer refunds, remakes and angry calls.
Faster kitchens	One-tap flow speeds the rush — more orders out per hour.
A growth engine	Ads to your own customers get cheaper over time; catering/wholesale leads finally followed up.
Scale-ready	Duplicates to new shops and future franchises — commission-free, every time.

4 How it works

1. Customer picks a shop, builds their pizza, and checks out (card online or pay-on-pickup).
2. **That shop's kitchen screen lights up with an alarm the instant the order lands.**
3. Staff tap once: **Accept** (+ time) → **Preparing** → **Ready**.
4. The customer watches live status on their phone.

5 The plan — stages & timeline

STAGE 0 Backup & access 1–2 days · done	STAGE 1 Stabilise + board 1–2 wks · in dev	STAGE 2 Ordering + pay 2–4 wks	STAGE 3 Shop rollout 1–2 wks	STAGE 4 Marketing 2–4 wks +	STAGE 5 Scale ongoing
---	--	--	--	---	---

Stage	What it involves
0 — Backup & access DONE	Full site backup, confirm hosting/logins, set up a safe way to build without taking the live site down.
1 — Stabilise + kitchen board IN DEV	Fix the menu bug, switch money to AUD + GST, wire your 43 items into ordering, stand up the live kitchen order board per shop.
2 — Ordering MVP + payments	Full pickup/delivery ordering, per-shop menus, online card payments (Stripe, AUD+GST), and getting found on Google (local SEO).
3 — Shop rollout	Tablet + printer per shop, staff training, soft-launch one store first, then all.
4 — Marketing launch	Facebook/Instagram & TikTok ads from your own data , catering/wholesale lead funnel, automatic review requests.
5 — Scale & franchise readiness	Multi-shop reporting, loyalty, gift cards, delivery rules, franchise admin controls.

6 The numbers — what it saves

Assumptions (conservative, planning only): average order **A\$32**; effective commission avoided **15–25%** (apps take 7–35%); month = 4.33 weeks; running cost ~\$200/mo; build at the mate's rate (~\$11k typical, \$8). A\$, ex-GST. Not guarantees.

Orders/week	Weekly sales	Saved/MONTH @15%	Saved/MONTH @25%
200	\$6,400	\$4,160	\$6,930
350	\$11,200	\$7,280	\$12,130
500	\$16,000	\$10,400	\$17,330

Across three shops, 350 orders/week keeps roughly \$7,280–\$12,130 every month that would otherwise go to the apps.

You vs the apps — even after my fee

The apps take ~20% of every order, forever. On your own system you pay a **flat \$800/week base plus 5% of online sales** (see §8) and **no per-order commission** — so even after paying me you're ahead at every level, and the gap *widens* as you grow:

Orders/week	Apps would take @20% /mo	My fee (base + 5%) /mo	You're better off by
200	\$5,542	\$4,157	+\$1,385/mo
350	\$9,699	\$5,889	+\$3,810/mo
500	\$13,856	\$6,928	+\$6,928/mo

You stay ahead of the apps — and the lead grows as you scale — because the base is fixed, every extra order tilts further your way. The one-off setup (~\$11k, at cost) pays back from this gap in about **3 months** at a typical 350 orders/week, and you keep the customer database the apps never give you. (Ad media is a separate, optional growth spend.)

7 Scope — what's included & what's not

Included in Phase 1

- Stabilise site + fix the menu bug
- AUD + GST, wire your 43-item menu
- Per-shop menus & the live kitchen order board (built)
- Online ordering: pickup & delivery
- Stripe card payments (AUD, GST invoices)
- Local SEO basics + Google Business per shop
- Analytics + pixels + first ad campaign setup
- Staff training + simple how-to docs

Later / not in Phase 1

- Loyalty, gift cards, advanced coupons
- Driver dispatch / live delivery tracking
- Native mobile app
- Franchise portal & multi-entity reporting
- Ongoing ad management (separate retainer)
- Third-party POS integration
- Professional photography / content production
- Hardware (tablets/printers) — supplied at cost

Key deliverables

Working storefront across the 3 shops · per-shop kitchen order boards · Stripe payments live · Google Business + local SEO · tracking pixels + first campaigns · admin training & documentation.

8 Investment & how we work together

This splits into two clean parts: **setup at cost**, then a **growth partnership**.

Part 1 — Setup, charged at cost

The upfront fee **isn't where I make money** — it covers the **real costs and overheads** of building and switching on your system: the ordering platform, the **Meta & TikTok** ad accounts, hosting, tools, and the first two weeks of development & research. It's offered at roughly **half of market** as a friend — essentially at my own build cost. You approve and pay **stage by stage**; you're never locked in.

Phase 1 — full build	Typical market	My rate (50%)
End-to-end (stabilise → ordering → payments → rollout → marketing setup)	\$16,000 – \$30,000	\$8,000 – \$15,000 (typical ~\$11,000)

Milestone payments (my rate)

When	Covers	Amount (A\$)
Now — to start	Stage 0–1: stabilise, AUD/GST, wire menu, kitchen board + research & social setup (first 2 weeks, ~70–90 hrs)	\$4,000 – \$5,000
Ordering + payments live	Stage 2: full ordering, Stripe, local SEO	\$3,000 – \$6,000

Rollout + marketing	Stage 3–4: shop rollout, ads, lead funnel	\$1,000 – \$4,000
+ Social media / ad test budget	First 2 weeks — <i>paid to Meta, not to me</i>	\$500 – \$1,000

To forward now to get started this fortnight (covers setup costs)

≈ A\$4,500 – \$6,000

incl. ~\$500–\$1,000 ad spend that goes straight to Meta

Part 2 — Running it for you (the ongoing arrangement)

Once you're live, I fully run and maintain the whole system for a flat A\$800/week base plus 5% of online sales. The base covers the labour and running costs so the lights are always on; the 5% share keeps me directly invested in growing your sales — I only earn more when you sell more. Combined that's roughly 10–15% of online sales (capped at 15%, and shrinking toward 10% as you grow), still well under the apps' 20–35% — and unlike them, you own every customer. (Ad media — the money paid to Meta/TikTok — is separate and your dial.)

What the \$800/week covers

- Full maintenance & uptime, monitored continuously
- Hosting, security & updates
- Kitchen-screen & staff support / on-call
- Payment, refund & order-issue handling
- The marketing engine — Meta & TikTok ads, local SEO, your customer database, catering funnel, review requests
- Monthly reporting
- Ongoing improvements & new features (no extra build fee)

Why it's fair both ways

- Predictable base — the weekly base keeps it running, easy to budget
- Aligned upside — the 5% means I earn more only when your sales grow
- A fraction of app fees — ~10–15% vs 20–35%, and falling as you scale
- All-inclusive — labour + running costs in the base; no surprise invoices
- Reviewed together at 12 months; you stay the owner of every account

Assumptions: average order A\$32; month = 4.33 weeks; \$800/wk = \$3,464/mo; app comparison at a typical 20% on the same sales.

Orders / week	Monthly online sales	Base /mo	+ 5% of sales	Total fee (% of sales)	Apps @20%
200	\$27,712	\$3,464	\$1,386	\$4,157 (15.0%, capped)	\$5,542
350	\$48,496	\$3,464	\$2,425	\$5,889 (12.1%)	\$9,699
500	\$69,280	\$3,464	\$3,464	\$6,928 (10.0%)	\$13,856

Base + share still comes in under the apps at every level — and as you grow it falls toward ~10% of sales while the apps stay at 20%+. Built-in cap: the combined fee never exceeds 15% of online sales, so it can't drift toward app territory — the cap only bites below ~230 orders/week (at 200/wk the \$4,850 base+5% is trimmed to \$4,157).

9 What it costs to run

Item	Monthly (A\$)
Managed hosting	\$50 – \$300
SMS / email notifications & CRM	\$50 – \$300

Card payments (Stripe)	1.7% + 30c per order (no monthly fee)
Advertising media (your dial)	\$500 – \$2,500
Tablet / printer per shop (one-off)	\$300–\$900 / \$400–\$1,200

10 What we need from you & risks

To start

- Sign-off + the first tranche
- Final menu (prices, dietary tags) + photos
- Each shop's address, hours, pickup/delivery + area
- Stripe + bank + ABN details
- **Meta Business** (Facebook + Instagram) & **TikTok Business** account logins/access
- Website/hosting + Google Business access
- A kitchen tablet + wifi per shop

Risks & handling

- **Big project:** staged — you fund & approve each step
- **Missed order:** alarm + backup SMS + printed ticket
- **Site breakage:** backup + staging; live site stays up
- **GST/pricing:** AUD+GST from day one, tested
- **Ad waste:** start small, measure, scale what works

11 Next step

To get moving this fortnight: **approve the first tranche (≈ A\$4,500–\$6,000), hand over the signed-off menu + photos + ABN/bank, and confirm shop details + access.** We take your first real online order within days, and have the live kitchen board running in about 1–2 weeks.

The system is already built and waiting. Let's switch it on.

Prepared by Elie D. All figures A\$, ex-GST, conservative planning estimates only — not guarantees. Payback/Year-1 computed on the client's investment at the mate's rate; Stripe pricing to be re-confirmed before launch. Based on a live-site inspection on 17 June 2026 and the project reference brief. My fee is ~50% of typical market rate as a friend; the ad budget is a pass-through cost paid directly to the ad platforms.
