

DOUGH BOSS.

WEBSITE REBUILD & CATERING LAUNCH

CATERING THAT FEEDS THE ROOM.

A complete rebuild of doughboss.com.au — operational functionality, GUI, front-end & back-end integration and APIs — with **catering** as the new flagship and **pay-now** built in. Three variants, the improvements, and how we execute.

WHY REBUILD, WHY NOW

MAKE CATERING THE ENGINE — NOT AN AFTERTHOUGHT

Today the site sells single pizzas well. Catering is where the big, planned, high-margin orders live — and it's barely surfaced. The rebuild puts catering at the centre, keeps everyday ordering fast, and uses the **pay-now** layer we already built to turn enquiries into **deposit-secured, board-routed bookings**.

HIGHER-VALUE ORDERS

Catering baskets are \$150–\$850 vs a ~\$36 walk-in order. One booking ≈ 5–20 normal orders, planned in advance.

OWN THE RELATIONSHIP

Commission-free, on your domain, with leads captured — recurring office & club accounts become a sales pipeline you own.

PAY-NOW READY

The Stripe layer (2.5.0) already verifies payments server-side. Catering reuses it for deposits + balance — minimal new build.

The brief: rebuild functionality, GUI, FE/BE integration and APIs — with catering and pay-now at the core.

PICK A DIRECTION

THREE WAYS TO BUILD IT

A · THE WOOD-FIRED CATERER

CATERING-FIRST

Catering is the flagship; single orders are the entry point. Boldest brand swing (ember glow).

B · DUAL-ENGINE

RECOMMENDED

BALANCED

Order & catering co-equal. Protects daily ordering, grows catering, flexes toward A over time.

C · BOSS MODE

CONVERSION-FIRST

Lean, app-like, pay-upfront. Two actions only. Fastest to build & highest conversion; least brand storytelling/SEO.

Our recommendation: build B, dressed in A's wood-fired creative, with C's frictionless checkout. Best of all three.

THE TRADE-OFFS

A VS B VS C

	A · WOOD-FIRED CATERER	B · DUAL-ENGINE (REC.)	C · BOSS MODE
Homepage hero	Catering leads	Split: Order Catering	Order + quote, lean
Best for	Catering as #1 growth driver	Protect ordering + grow catering	Max conversion, min content
Catering depth	Rich hub + on-site/truck	Rich hub (co-equal)	Quote form only
Brand storytelling / SEO	Strong	Strong	Weaker
Risk	Dilutes daily-order habit	Low — most flexible	Thin brand, less organic reach
Build effort	Med–High	High (safest ROI)	Low–Med (fastest)

B is the safe, high-ceiling choice. If catering revenue proves dominant, the same build leans into A without a rebuild.

THE PRODUCT TO SELL

PACKAGES, PER-HEAD & THE DEPOSIT MODEL

THE LUNCH RUN

Serves 8–10 · corporate

\$165

Mixed pizzas, garlic breads, salad, drinks

THE PARTY BOX

Serves 15–20 · parties

\$320

Crowd-pleasers + a specialty, sides, drinks

THE FOOTY FEED

Serves 25–30 · game day

\$520

High-volume mix, sides, drinks

THE BIG EVENT

Serves 40–50 · functions

\$850

Full spread, custom build available

PER-HEAD & RULES

\$19/head custom (min 10) · min order **\$150** · lead time **48 hrs** (72 hrs for 40+) · delivery free within 8 km, \$25 to 15 km, quote beyond.

DEPOSIT VIA PAY-NOW

30% deposit at booking (Stripe), **balance auto-charged 24 hrs prior** (or pay-on-pickup). Routes by postcode to the nearest shop's kitchen board.

UPSELLS & B2B

Dessert platter +\$45 · GF/vegan +\$6/pizza · keep-warm setup +\$35. Pursue **SME office accounts & sports/community clubs** (recurring).

THE PAGE THAT CONVERTS

CATERING PAGE BLUEPRINT

1 **Hero** — "Catering that feeds the room" + Build Your Quote

2 **Social proof** — 4.9 from 300+ events

3 **Packages** — 4 cards, per-head, Select

4 **Quote builder** — headcount · date · pickup/delivery · shop · live deposit

5 **How it works** · **Gallery** · **Reviews** · **FAQ**

6 **Final CTA band** + 3 shop details

THE CONVERSION FLOW

The single most important moment is the Pay Deposit click — that's where intent becomes a committed, board-routed booking. Make it wallet-first and frictionless.

Mobile: sticky "Build Your Quote" bar, one field per screen, tap-to-call, swipeable packages & gallery.

A PREMIUM UPGRADE — SAME DNA

BOLD BLACK-AND-WHITE, PLUS ONE SPARK

TYPE

Bebas Neue stays for display, labels & buttons (never body).
Add **Inter** for body — clean, legible, tabular figures for prices.

COLOUR — ADD ONE ACCENT

Keep mono (Ink, Slate, Paper). Introduce **Ember Red**
#E2231A for CTAs, "Pay Now" & price tags only (≤10% of any
screen).

SYSTEM

8px spacing scale, 12-col grid, rounded 8–12px cards, soft
shadows, 150–250ms motion. Dark-slate food photography,
consistent grade.

PAY NOW

BUILD YOUR QUOTE

ORDER NOW

VIEW MENU

\$165

Upgrade from today: a body face, one disciplined accent, real spacing tokens and rounded corners — premium, not poster-flat. Plus a full accessibility pass (focus states, contrast, reduced-motion).

REUSE WHAT WE BUILT · ADD ONLY WHAT'S NEW

HOW IT'S WIRED

FRONT-END

Hybrid FSE block theme + vanilla-JS islands. Owner edits catering/marketing pages in WordPress; the ordering/builder/Stripe/KDS stay as shortcode islands (no rewrite). No bundler. CWV budget, self-host Bebas, conditional asset loading, AVIF/WebP images.

BACK-END

New **catering package CPT** (owner-editable) + a new **enquiries table** with a lifecycle (new → quoted → deposit_paid → confirmed → balance → fulfilled). **Reuse** orders/locations/KDS routing. New admin "Catering" screen; DB version bump + migration.

PAYMENTS & APIS

Extend pay-now: **two PaymentIntents** (deposit now, balance near event) + saved **Customer**; **webhook** (`payment_intent.succeeded`, refunds) as source of truth; refunds UI; GST tax invoices. Analytics from existing hooks; SEO schema (LocalBusiness/Menu/Offer/FAQ/Review).

WHAT GETS BETTER

THE UPGRADE LIST

FUNCTIONALITY

- Catering packages + live quote builder
- Deposit + balance payments; lead/CRM capture
- Per-shop location pages + shop routing
- Order history / accounts (optional v1); gift cards (later)
- Scheduled catering & SMS notifications (roadmap)

GUI / UX

- Design-system upgrade: body font, ember accent, spacing tokens, rounded cards
- Premium dark-slate imagery system
- Mobile-first sticky CTAs & wallet-pay
- Full accessibility pass (focus, contrast, reduced-motion)

FRONT-END & BACK-END

- Hybrid FSE block theme + vanilla-JS islands
- Performance budget / Core Web Vitals, self-hosted fonts
- Catering CPT + enquiries table + lifecycle + admin screen
- Reuse orders/locations/KDS; DB migration

APIS / INTEGRATION

- Stripe deposit+balance, Customer reuse, **webhook source-of-truth**, refunds, GST invoices
- Analytics events from existing order hooks + Stripe webhooks (GA4, consent-aware)
- SEO schema + 3 Google Business Profiles

HOW WE BUILD IT — PARALLEL WORKSTREAMS, DRAFT-FIRST

THE PLAN · ~8-10 WEEKS

PHASE 0 · WK 1

Discovery & sign-off

Pick a variant, confirm the catering offer, gather brand assets, get WordPress/Stripe access + a backup.

PHASE 1 · WK 1-2

Design system + pages

Tokens, then homepage + catering + location templates designed and approved (draft theme preview).

PHASE 2 · WK 3-4

Theme build + content

FSE block theme, marketing pages, plugin shortcode islands wired, copy & imagery in.

PHASE 3 · WK 5-6

Catering back-end

Package CPT, enquiries table + lifecycle, admin Catering screen, REST enquiry, KDS routing.

PHASE 4 · WK 6-7

Payments

Deposit+balance PaymentIntents, webhook, refunds, GST invoices. Test mode → live keys.

PHASE 5 · WK 8+

SEO, analytics & launch

Schema, GBPs, GA4/consent, QA + a11y, go-live on a fresh backup, monitor first weekends.

Every step is built on a draft theme and previewed — nothing touches production without your go-ahead and a fresh backup. Workstreams run in parallel to compress the timeline.

YOUR CALL

WHAT I NEED FROM YOU TO ACCEPT & START

DECISIONS

-  Pick a variant — A, B (recommended) or C
-  Approve the catering offer (packages, prices, 30% deposit, lead times, delivery zones) — or adjust
-  Brand: keep Dough Boss, OK to add Ember Red accent + a body font?
-  Deposit vs full-prepay default - refund/cancellation policy
-  v1 scope: accounts / gift cards in now or later?

ASSETS & ACCESS

-  Logo vector (have it) + real food / event photos — or approve AI-generated placeholders
-  3 shop details, hours, ABN, any reviews/testimonials
-  WordPress admin + hosting access (via WPVibe) + go-ahead to work on a draft theme
-  Stripe: test keys now, live keys + business entity at launch
-  Timeline & budget sign-off - privacy/terms + GST invoicing details

RECOMMENDATION: VARIANT B — DUAL-ENGINE, WOOD-FIRED CREATIVE, FRICTIONLESS PAY-NOW.

DOUGH BOSS.
