

ONLINE & CATERING ORDERING SYSTEM · PROPOSAL

Your Shop. Your Customers. Your System.

A complete, commission-free ordering and catering platform built for Dough Boss — so every order, and every customer, stays yours. Across Bankstown, Revesby & Roselands.

\$0

commission — keep what the apps take

100%

your customers — their details, your list

~2 wks

to go live across all three shops

“Keep every customer. Keep every dollar the apps would’ve taken.”

|--|---|

SECTION 01 · WHY CHANGE ANYTHING

The apps rent you your own customers

Uber Eats and Menulog bring orders — then take a cut of every one, keep the customer's details, and bury your brand inside theirs. The busier you get, the more it costs.

7–35%

skimmed off every order

Commission on each sale — it scales up exactly as your volume grows, with no ceiling.

0%

of the customer is yours

Their name, number and order history live in the app. You can't market to them, ever.

~\$3,000

gone in a single busy week

On ~\$12k of weekly online sales at ~25%, that's roughly \$150k a year leaving the business.

You're building someone else's asset. Every order grows their customer list — not yours.

SECTION 02 · THE FIX

Your own ordering system — built to win

Your storefront, your catering, your kitchen flow, on tools and accounts you own. A flat weekly fee instead of a cut of every sale.

You own the relationship

Every customer name, number and order history sits in your system — the asset that makes future marketing cheap and repeat orders easy.

The maths is on your side

A flat weekly fee plus a small, capped share beats 7–35% commission the moment volume picks up — and it can never reach app rates.

Built for how you actually run

Storefront, catering and the kitchen board are designed around three shops with automatic order routing — not a generic template.

Live fast, low risk

Standard, proven tools on your existing site and your own Stripe account — live in about two weeks, and you can run it alongside the apps at first.

“Keep every customer. Keep every dollar the apps would’ve taken.”

SECTION 03 · END TO END

From their phone to your kitchen — in one flow

1

Customer orders

Browses your branded menu, builds a pizza or picks a catering pack, chooses pickup or delivery.

2

Pays by card

Secure Stripe checkout. Money settles into **your** Stripe account, with an automatic GST receipt.

3

Lands on the iPad

The order appears instantly on the right shop's kitchen board with an alert that loops until accepted.

4

Kitchen cooks

One tap to accept and set an ETA. The customer watches live status update on their phone.

5

Ready & yours

Picked up or delivered. You keep the margin — and the customer's details for next time.

Automatic shop routing

Delivery postcodes and pickup choice send each order to the closest of your three kitchens.

Server-checked pricing

Every total is recalculated on the server in AUD with GST — what they pay is always correct.

No app to download

It all runs in the phone's browser. Nothing for the customer to install, nothing for staff to juggle.

SCREEN 01 · ORDER ONLINE

Your branded storefront

Build your pizza

 Small 9"	\$13.90
 Large 13"	\$21.90
 Grilled chicken	+\$3.50
 Mushrooms	+\$2.00
 Bocconcini	+\$3.00
 Kalamata olives	+\$2.00

Large + 3 toppings **\$30.40**

Live pricing as toppings are added — recomputed on the server, always in AUD with GST shown.

Your menu, your branding — customers order direct, no middleman skimming every sale.

SCREEN 02 · CATERING — THE HIGH-MARGIN ENGINE

Catering orders, locked in online

Office Lunch
Serves 10–12
6 large pizzas, 2 garlic breads
\$129

Big Footy Feast
Serves 30–35
16 large pizzas, 6 sides, 4 drinks
\$379

Party Pack Selected
Serves 18–20
10 large pizzas, 4 sides, 2 drinks
\$229

Grazing (Build-your-own)
Serves 40+ · ~\$11/head
Custom platters to suit the event
from \$449

Party Pack — order summary

Subtotal (GST incl.)	\$229.00
Fulfilment	Delivery +\$15 · within 8 km
Fulfilled by	Dough Boss Revesby
Requested	Fri 19 Jun · 12:30pm
Deposit due now (30%)	\$68.70
Balance on pickup/delivery	\$160.30

Pay \$68.70 deposit & confirm

Minimum 24 hrs notice · deposit secured by Stripe · routes straight to the Revesby kitchen board.

Big platters, big margins — quote and lock in catering orders without a single phone tag.

SCREEN 03 · THE CUSTOMER'S PHONE

Order & pay in seconds — then watch it cook

Customers watch their order in real time, from kitchen to doorstep, on their own phone.

- **Card payment built in** — money settles to your Stripe account.
- **Live status** cuts “is my order ready?” phone calls.
- **Their details captured** — the start of a list you own.
- **Works on any phone** — no app to download.

SCREEN 04 · THE KITCHEN IPAD — THE HEART OF THE SYSTEM

Every order lands on the kitchen screen instantly

Orders land instantly with an audible alert that loops until a staff member taps Accept. Clear, ordered, impossible to miss.

SCREEN 05 · THE OWNER'S MONEY — IN YOUR OWN STRIPE

Payments & takings, all in your account

dashboard.stripe.com · Dough Boss Pty Ltd

\$1,847.30

Today · 52 orders

\$11,920.85

This week · 327 orders

\$36.45

Average order value

TIME	ORDER	CUSTOMER	AMOUNT	STATUS	CARD
6:21pm	DB-...A4K9	Sam P.	\$48.50	Paid	Visa
6:18pm	DB-...B7T2	Layla M.	\$34.30	Paid	Mastercard
5:55pm	DB-...X3M1	Aisha K.	\$41.20	Paid	Amex
1:10pm	DB-...W8Q4	David N. (catering deposit)	\$68.70	Paid	Visa
Yest.	DB-...J1L0	Chris R.	\$22.40	Refunded	Visa

Connected ✓

Currency

AUD · auto receipt

Built switched **off and in test mode**, proven with test cards, then flipped to live with your keys. Your money never touches us — Stripe pays you directly, minus only Stripe's ~1.7% + 30c.

Payments hit your own Stripe account daily — you hold the money from day one.

SCREEN 06 · ONE VIEW ACROSS THREE SHOPS

Your sales dashboard

See sales, top items and customers across all three shops, live, in one place.

SECTION 05 · THE COMPLETE PLATFORM

Feature-rich — and all achievable

Live from day one

INCLUDED

ORDERING

- ✓ Branded storefront
- ✓ Sizes & toppings pricing
- ✓ Pickup & delivery
- ✓ Sold-out / item toggles
- ✓ Custom pizza builder
- ✓ Real-time, server-checked totals
- ✓ AUD & GST handling
- ✓ Mobile-first, no app

CATERING

- ✓ Catering packages
- ✓ Deposits via Stripe
- ✓ Per-head & custom grazing
- ✓ Lead-time rules

KITCHEN & OPERATIONS

- ✓ Live iPad order board
- ✓ Audible new-order alert
- ✓ Multi-shop order routing
- ✓ New / Preparing / Ready lanes
- ✓ One-tap accept & ETA
- ✓ Order history

PAYMENTS & OWNER TOOLS

- ✓ Stripe card payments
- ✓ Auto GST receipts & refunds
- ✓ Open/closed & hours control
- ✓ Your account, daily payouts
- ✓ Self-serve menu manager
- ✓ Sales dashboard, 3 shops

Available add-ons

WHEN YOU'RE READY

- + Loyalty rewards — “10th pizza free”, tracked automatically
- + SMS notifications — “order ready” / “out for delivery” texts
- + Scheduled & recurring catering — lock in office accounts
- + Auto-printed kitchen dockets — backup to the screen
- + QR table ordering — dine-in scan, order & pay
- + Google review booster — auto review link after pickup
- + Email marketing — win-back & specials to your own list

Add-ons slot into the same system — no rebuild, no new platform, switched on as the business grows.

SECTION 06 · THE HONEST COMPARISON

Dough Boss vs the delivery apps

	Your Dough Boss system	Uber Eats / Menulog
Commission per order	\$0 — flat weekly fee	7–35% of every sale
Who owns the customer	✓ You do	✗ The app does
Customer data & contact list	✓ Yours to keep & market to	✗ Locked in their app
Your branding front & centre	✓ Full — your site, your look	✗ Buried in their marketplace
Catering & large orders	✓ Built-in, with deposits	✗ Not really supported
Payouts	Your Stripe, paid daily	Held, then paid on their cycle
Menu & price control	✓ Instant, self-serve	Via their portal
Marketing to past customers	✓ SMS & email (add-on)	✗ Not possible

Same orders, same kitchen — but every customer and almost every dollar stays in the business.

SECTION 07 · THE QUESTIONS YOU'RE RIGHT TO ASK

Straight answers

“It’s a lot to pay each week.”

At \$800/week plus 5% (capped at 15%), you typically pay well under what Uber Eats and Menulog take at 7–35%. Past a modest volume, the system pays for itself — and the cap means it can never reach app rates.

“Who handles the hosting and tech?”

It runs on your existing WordPress site with standard, proven tools. We set it up, maintain it, and you’ve got a friend on the phone — not a call centre.

“Is it really mine, or am I renting?”

It’s yours — your domain, your Stripe account, your customer data, your menu. The weekly fee is for running and supporting it, not for permission to use your own shop.

“Will my staff actually use it?”

The kitchen sees one clear iPad board — simpler than juggling app tablets. We train your team on-site and stay on hand through the first busy weeks.

“Switching off the apps sounds risky.”

You don’t switch anything off on day one. Run this alongside the apps, watch the direct orders grow, then wind the apps back on your terms.

“What if it breaks on a Friday night?”

It’s built to keep taking orders even if a screen drops, and you can reach us directly. We watch the first busy weekends closely so issues are caught early.

SECTION 08 · WHAT IT COSTS

Simple, capped, and on your side

ONE-OFF SETUP

\$4,000–5,000

at cost · across all three shops

- Build, brand & menu load
- Stripe & WordPress connected
- Kitchen iPads set up
- Staff training & go-live support

TO RUN IT

\$800/week

+ 5% of online sales · capped at 15%

- Hosting & maintenance
- Updates & new features
- Direct support — a friend, not a call centre
- Marketing help to grow direct orders

CARD PROCESSING

~1.7% + 30c

per transaction · paid to Stripe

- Industry-standard AU card rate
- Goes to Stripe, not to us
- Funds settle into your account
- Automatic GST receipts

At ~\$12k/week online: the apps take ~\$3,040.
This system runs ~\$1,400 all-in — and the customer stays yours.

A flat, capped fee instead of an open-ended cut. The more you grow, the more the difference compounds in your favour — not the app's.

SECTION 08 · WHAT HAPPENS NEXT

Three steps to go live

1

Set up · Week 1

We load your menu, branding and shop details, and connect your Stripe and WordPress.

2

Test · Week 2

We run real orders through storefront, catering and the kitchen board with your team.

3

Go live

We switch it on across all three shops and stay close through the first busy weekends.

What we need from you to start

- Your full **menu** — items, sizes, prices
- **Shop details** — addresses, hours, contact per location
- Your **ABN** (for GST tax invoices)
- **WordPress access** to doughboss.com.au
- A **Stripe account** in the business name (we'll help set it up)
- One **brand decision** — Dough Boss or Bite Pizzas

THE WHOLE PITCH IN ONE LINE

**Keep every customer.
Keep every dollar the
apps would've taken.**

Setup ~\$4–5k at cost · \$800/wk + 5% to run (capped 15%) — a fraction of app fees.
