

ONLINE & CATERING ORDERING SYSTEM · A PROPOSAL PREVIEW

# Your Shop. Your Customers. Your System.

A complete online and catering ordering platform built for Dough Boss — so every order, and every customer, stays yours. Across Bankstown, Revesby & Roselands.

**\$0**

commission — keep what the apps take

**100%**

your customers — their details, your list

**~2 wks**

to go live across all three shops

# Why this wins

The apps rent you your own customers and skim 7–35% of every sale. This flips it: your storefront, your catering, your kitchen flow — running on tools and accounts you own.

## You own the relationship

Every customer name, number and order history sits in your system — not a delivery app's. That list is the asset that makes future marketing cheap.

## The maths is on your side

A flat weekly fee plus a small share beats 7–35% commission the moment volume picks up — and it's capped, so it can never reach app territory.

## Built for how you actually run

Storefront, catering and the kitchen board are designed around three shops with order routing — not a generic template bolted on.

## Live fast, low risk

Standard, proven tools on your existing site and your own Stripe account. Up and running in about two weeks — and you can run it alongside the apps at first.

**“Keep every customer. Keep every dollar the apps would’ve taken.”**

# Your branded storefront

doughboss.com.au/order

Dough Boss — Real Wood-Fired Pizza, Made Fresh Daily

Order direct. No app fees. Pickup or delivery from Bankstown, Revesby & Roselands.

Order Now

Catering

Margherita

San Marzano, fresh mozzarella, basil

\$16.90

Add

Pepperoni

Double pepperoni, mozzarella, oregano

\$18.90

Add

Truffle Mushroom

Field mushrooms, truffle oil, parmesan

\$24.90

Add

Wagyu & Onion

SOLD OUT

Wagyu beef, onion jam, rocket

\$26.90

Sold out

Your menu, your branding — customers order direct, no middleman skimming every sale.

## Build your pizza

Small 9" \$13.90

Large 13" \$21.90

Grilled chicken +\$3.50

Mushrooms +\$2.00

Bocconcini +\$3.00

Kalamata olives +\$2.00

Large + 3 toppings

\$30.40

Live pricing as toppings are added. Every price is recomputed on the server, so the total is always correct — and always in AUD with GST shown.

# Catering orders, locked in online

Office Lunch

Serves 10–12

6 large pizzas, 2 garlic breads

\$129

Big Footy Feast

Serves 30–35

16 large pizzas, 6 sides, 4 drinks

\$379

Dough Boss Bankstown · 0466 xxx xxx

Customers watch their order in real time, from kitchen to doorstep, on their own phone.

- **Card payment built in** — money settles to your Stripe account.
- **Live status** cuts “is my order ready?” phone calls.
- **Their details are captured** — the start of a list you own.
- **Works on any phone** — no app to download.

# Every order lands on the kitchen screen instantly

Orders land on the kitchen screen instantly — with an audible alert that loops until a staff member taps Accept. Clear, ordered, impossible to miss.

# Payments & takings, all in your account

We build it switched **off and in test mode**, prove it with test cards, then flip to live with your keys. Your money never touches us — Stripe pays you directly, minus only Stripe's ~1.7% + 30c.

# Your sales dashboard

BUILT IN — AND READY TO GROW

# What it does now, and what we can add

The storefront, catering, kitchen board, payments and dashboard above are the core build. Each of these slots straight in as you grow — no rebuild, no new platform.

## Loyalty rewards

"10th pizza free", tracked automatically — drives repeat orders without discounting your margin.

## Scheduled & recurring catering

Lock in weekly office accounts and footy-season bookings in advance, deposit paid up front.

## SMS notifications

Auto "order ready" / "out for delivery" texts — fewer phone calls, fewer no-shows.

## Auto-printed kitchen dockets

Orders print straight to the kitchen printer as a backup to the screen — nothing re-keyed.

## QR table ordering

Dine-in guests scan, order and pay from the table — faster turns, less counter pressure.

## Google review booster

Auto-texts a review link 30 min after pickup — grows ratings and your "pizza near me" ranking.

# The questions you're right to ask

## **“It's a lot to pay each week.”**

At \$800/week plus 5% (capped at 15%), you typically pay well under what Uber Eats and Menulog take at 7–35%. Past a modest order volume, the system pays for itself — and the cap means it can never reach app rates.

---

## **“Who handles the hosting and tech?”**

It runs on your existing WordPress site with standard, proven tools. We set it up, maintain it, and you've got a friend on the phone — not a call centre.

---

## **“Is it really mine, or am I renting?”**

It's yours — your domain, your Stripe account, your customer data, your menu. The weekly fee is for running and supporting it, not for permission to use your own shop.

## **“Will my staff actually use it?”**

The kitchen sees one clear iPad board — simpler than juggling app tablets. We train your team on-site and stay on hand through the first busy weeks.

---

## **“Switching off the apps sounds risky.”**

You don't switch anything off on day one. Run this alongside the apps, watch the direct orders grow, then wind the apps back on your terms.

---

## **“What does it cost to start?”**

Setup is roughly \$4,000–5,000 at cost to build and launch across the three shops. Then \$800/week + 5% (capped 15%) to run, maintain and market it — Stripe's ~1.7% + 30c per card is separate and goes to Stripe.

## WHAT HAPPENS NEXT

# Three steps to go live

1

### Set up · Week 1

We load your menu, branding and shop details, and connect your Stripe and WordPress.

2

### Test · Week 2

We run real orders through storefront, catering and the kitchen board with your team.

3

### Go live

We switch it on across all three shops and stay close through the first busy weekends.

### What we need from you to start

- Your full **menu** — items, sizes, prices
- **Shop details** — addresses, hours, contact per location
- Your **ABN** (for GST tax invoices)
- **WordPress access** to doughboss.com.au
- A **Stripe account** in the business name (we'll help set it up)
- One **brand decision** — Dough Boss or Bite Pizzas

### THE WHOLE PITCH IN ONE LINE

**Keep every customer.  
Keep every dollar the  
apps would've taken.**

Setup ~\$4–5k at cost · \$800/wk + 5% to run (capped 15%) — a fraction of app fees.

Let's switch it on.
